JavaScript : HISTORY

1995

In 1995 Netscape Navigator realize that they need some programming language which is simple and helps to add the interactivity in the website.

At that time **Brendan Eich** works for Netscape . He invented **javascript** in 10 days.

Initially the name of javascript know as **Mocha** later it changed to **liveScript.**
But liveScript doesn't gain much popularity as Netscape wants. So they research and found that one very popular language was in a market i.e **Java .**

So, for increase popularity of liveScript in market . Netscape change **liveScript -> javaScript**

1996

At that time there was one more popular browser in a market i.e **Internet Explorer.** They see that Netscape Navigator Browser is very popular due to **javaScript .**

So they took some feature of javascript and implement some new feature and make thier own language called **JScript**

Problem face by users.

If website build using javaScript then it best viewed in Netscape Navigator.

If website vuild using jScript then it best viewed in Internet Explorer

1997

JavaScript : HISTORY

● **1997**

To resolve design confict between javascript and Jscript.
Netscape handed JavaScript over to **ECMA .**
Now Ecma decide all the browser should follow a particular
Standard .

From there JavaScript became an ECMA standard **(ECMA-262)**

1997 **ES1 ECMAScript 1 was released**

Internet Explorer 4 was the first bowser to Support ES1

● **1998**

ES2 ECMAScript 2 was released

Netscape 42 was released with JavaScript 1.3

● **1999**

Internet Explorer 5 was the first bowser to Support ES2

ES3 ECMAScript 3 was released

● **2000 - 2008**

IE 5.5 was the first browser to support ES3.
Netscape 62 was released with JavaScript 1.5
Firefox 1 was released with JavaScript 1.5

ES4 ECMAScript 4 was abandoned

● **2009**

ES5 ECMAScript 5 was released

● **2015**

ES6 ECMAScript 5 was released
